

# OTARI OBOLADZE

## Software Engineer

@ otari.oboladze@outlook.com  Barcelona, Spain  linkedin.com/in/otari-oboladze/

## SUMMARY

Hi, I'm a results-oriented code lover who can write, build, deploy, release and maintain software. DevOps mindset makes me understand each aspect of the software development lifecycle from initial design to a final product that works, is well documented and is easy to maintain. Some of my notable skills are:

- Getting projects done within time and budget.
- Designing complex systems.
- Managing developers.

In short, here is my software mantra: "think it, build it, ship it".

## EXPERIENCE

### Sr. backend developer

Explorins, 2024-2025

Some of the notable achievements:

- Replaced external core dependency with internal blockchain platform.
- Optimized AWS EC2 servers and managed PostgreSQL databases.
- Created monitoring channels for blockchain backend.

What did I learn:

- Kubernetes, Helm and EKS. AWS advanced networking and Lambda. NodeJS and ExpressJS.

### Teach lead

Science for Change. 2022-2024

Some of the notable achievements:

- Managed multiple platforms and applications, took system design decisions and maintained core projects.
- Managed containers on the AWS and deployed CI/CD pipelines.
- Hired and trained team members. Managed in-house and external developers.

What did I learn:

- Project management and planning, Github Projects, CI/CD. Containerization. AWS EC2, Route 53, LightSail, Laravel

### DevOps Engineer

Albedo Telecom, 2021-2022

Some of the notable achievements:

- Restructured the way company saved and updated registers: from handwriting and excel sheets to fully functional responsive web app.
- Transformed loosely written entries into database that translated searching/sorting time from hours to milliseconds.
- Communicated and listened with direct users, investigated and selected frontend components and visuals for their needs.

What did I learn:

- Pitfalls of miscommunication within projects. Different SQL database access tools. Software testing, Linux, TCP/IP networking.

### Full Stack Developer

VT Convert, 2020

Some of the notable achievements:

- Managed multiple WordPress projects by designing lay-outs, adapting themes to projects and tweaking plug-ins with custom CSS/JS.
- Created SQL database for CMS and optimized it to 3NF.
- Maintained crypto exchange platform by debugging, lead generating and customer communication. Automated chart generating scripts.

What did I learn:

- Client-server architecture. LAMP stack. Cryptocurrency pricing.

## TECH STACK

### Design and Frontend

Figma, Sketchbook, WordPress, Moodle, HTML, CSS, Bootstrap, JavaScript

### Backend and Database

PHP, CodeIgniter, Laravel, Python, NodeJS, SQL (MySQL, SQLite, PostgreSQL)

### Ops and Cloud

Git, Docker, Kubernetes, Helm, AWS (EC2, EKS, Lambda, S3)

### Testing and Monitoring

PHPUnit, Jasmine, Cypress, Grafana, AWS CloudWatch

### Network and Infrastructure

AWS VPC, AWS Route 53, Wireshark, aircracking

### Project management

GitHub Actions, Jira, Confluence, Miro

## EDUCATION

Máster en Programación Informática (Java, C# y PHP)

Esneca Business School, 2019

Certificados de profesionalidad, TIC: informática y comunicaciones

Nascor Training, 2019

## CERTIFICATION

### Practical GitHub Project Management and Collaboration

LinkedIn Learning Certificate Id:  
227a388c4be24477a0e939109365c80d5bc30b2f41005a59  
377a9ee43ab11fc3

### Mapping the Modern Web Design Process

LinkedIn Learning Certificate Id:  
2a3ed869d71d635c930cd4a3bda6c1a851cbdada0be9e7b  
405026311d7ff3e43
